IP: Key to controlling cost

- R&D projects in pipeline:

  - Next-generation user interface

  - Operating System <u>Plan 9</u> a small build with many "cloud-like" features

  - <u>https://github.com/brief-ds/micrograd</u> a 24 kilobytes autodiff framework for Machine Learning, loads 10x faster than PyTorch, 30x faster than TensorFlow

  - A generative AI architecture generating only one or few "thoughts" at once, energy-efficient and explainable
